WORK EXPERIENCES

Since Dec. 2018

Front developer – ARAMISAUTO.COM, PARIS

Develop a new version of the website as a SPA.

Use « Component based » design pattern to develop Vue.js 2.6 generic components, organised in micro-fronts libraries and documented with Storybook.

Mobile first development with Sass.

Versioning with « conventional commits » rules and use of Airbnb stylelint norms to help maintain a top code quality.

Build Vue.js components as .umd and publish them as npm packages.

Pre-production & production release of pages following Agile approaches, with the Product and Devops teams.

Improvement of global perf KPIs and SEO following Google recommandations, WebPageTest and Lighthouse tools**.**

May 2018 Dec. 2018

Front developer - WYND, PARIS

Development of an Amazon-type marketplace with WordPress and Woocommerce.

Refactorization of the WordPress theme on a « Component based » design pattern, in SASS with JavaScript lazy loading imports.

Pair development with devops team, use of their norms and technical stack under Docker with assets génération, installation of both internal and external plugins with Composer.

Use of Git and « conventional commits », in a Scrum way, with Jira.

Learning of new methods and conventions every week during internal tech-workshops.

March. 2018 May. 2018

PHP developer - WYND, PARIS

PHP 7.2, Symfony 4. API Rest, Event listeners, Entities.
